

TRIM LEVEL GUIDE

Volvo VNL Series Options

Volvo Trucks. Driving Progress.

Overview

We've combined exterior and interior design choices in our new trim level options so it's easier than ever to get the truck you want. No need to spend hours checking individual specs and hoping your features match up. Every trim level comes standard with our best aerodynamic features as well.

Select your cab model. Pick a trim level. Choose a paint color. With just a few quick choices you're guaranteed to get great styling in a VNL that's perfect for you.

To customize a truck for your operation, try the new **Volvo VNL configurator** or consult with your Volvo Trucks dealer.

Ultimate Trim Level

When you want everything about your operation to say premium, go for our Ultimate trim level.

Incredible attention to detail is apparent in each design choice, with high-end finishes inside and out. Sustainably-harvested, real wood trim, Sula Blue accents, optional carpets, and satin chrome captivate the eye.

So many premium features come standard with Ultimate, like push-button ignition, a convenient infotainment center, and a leather-wrapped steering wheel. Choosing the Ultimate trim package transforms your VNL from a workhorse to a thoroughbred.

Edge Black Trim Level

Stand out without saying a word. A VNL in Edge Black trim is distinctive from any other truck on the road. Striking, understated and powerful—Edge Black is unique.

The design starts with a high-end gloss black finish on the grille, bumpers, and mirrors. The theme continues on the outside with black trim for the chassis fairings and accents.

Inside, Edge Black features dynamic accents on the door panels, seats, and dash.

VOLVO

Edge Trim Level

The bold styling in the Edge trim level begins with a gloss black grille and a Satin Chrome surround. The bumper and air intakes continue the look. Cab mirrors, hood mirrors, and chassis fairings all provide a more upscale image in matching body color paint.

Edge comes standard with a host of popular features. You get all the amenities of our standard technology package plus upgrades including premium audio.

Core
Trim Level

Our Core trim option is ideal for carriers with multiple drivers moving in and out of a truck cab. Choosing the Core trim level signals to your customers that they can expect hard work and dedication when you show up at the dock.

Core is a practical and stylish choice with many exterior trim features that never require painting during repair or replacement. Inside the cab, Core is more than ready for tough delivery routes. The neutral Fathom Blue and Logan Grey color scheme is easy to clean and hides the wear that comes with multiple daily stops.

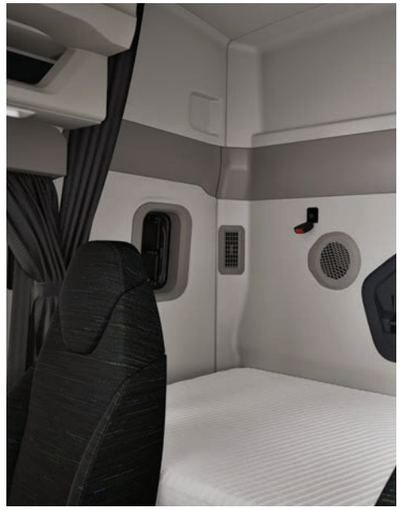

Exterior
